## About the course

This course will run for 18 weeks in 2012:

**Start date:** 8 February 2012

**Finish date:** 8 June 2012

Hours of the course will be: 8.30am-4.30pm (with half an hour for lunch). The Course will run Tuesday-Friday inclusive.

### Venue:

The course will be based at the Golden Bay Workcentre Trust, 84 Commercial Street, Takaka, Golden Bay.

### Tutor:

Mary Ann Tait will be the primary tutor for this training programme. Mary Ann is a trained secondary school teacher with additional qualifications in Computing (Diploma in Information Communication and Technology in Education, Certificate in Online Teaching and Learning, and Certificate in Web Writing and Design).

## Some things you will learn

This is a course that specialises in the foundation skills required for web design. You will learn how to build a webpage using Notepad to enter basic XHTML mark-up language. You will also be introduced to the web-authoring programme FrontPage 2003.

As part of your web design training you will be taught how to digitise images using a scanner and digital camera. You will then learn how to create, edit and manipulate computer graphics using a computer graphics programme such as Paint Shop Pro 8.

## Computing as a career

### Educational qualifications

*This course will include:*

- A range of NZQA unit standards in the Generic Computing field that relate to web design, computer graphics and the use of computer peripherals.

### Skills for the future:

*Next steps:*

Pathways; Portfolio; CV; Skills lists; further training and educational options in computer graphics and web design.

### Self Employment:

*Designing and Updating websites:* Understanding the basics of web design and editing. Creation of operational websites. Ability to upload and edit websites.

*Create, edit and manipulate graphics:* Creation/manipulation of digital graphics suitable for sale or personal use.
